

HydroWorx 200

Offering you a competitive edge in a compact, affordable package.

Small space? Small budget? We have just the product for you.

The HydroWorx 200 is designed for small spaces and existing facilities. Designed specifically for physical therapy clinics, the HydroWorx 200 utilizes warm water and our renowned underwater treadmill technology to give facilities a competitive advantage that delivers superior rehabilitation outcomes for patients. If you've always wanted to offer aquatic therapy but never had the space or budget, the HydroWorx 200 is the product for you, fitting into a compact 100 square feet and through a standard 36" door.

The compact underwater treadmill and jet system are made with marine grade stainless steel and offer physical therapists, rehabilitation and wellness directors a way to:

- ◆ Accurately simulate land-based walking, retro-walking and running with underwater treadmill speeds ranging from 0.2-6 mph.
- ◆ Increase strength and flexibility to reduce falls with resistance jet and deep tissue massage capabilities.
- ◆ Challenge all planes of motion with enough room to move freely.
- ◆ Safely and precisely adjust unweighting levels as patients progress with a touch of a button. The unit fills and drains in less than 3 minutes and 30 seconds.
